Academic calendar

1st semester: Mid-September – end of January
2nd semester: End of January – end of May

Application procedure

French proficiency requirement:

Most courses are taught in French and the students are expected to be able to communicate in this language.

Some teachers will occasionally speak English to make it easier for the foreign students but this shouldn't be considered as a rule.

Level required

We accept 2nd, 3rd and 4th year students.

Application procedure

Application must contain:

- The ÉSAD application form completed and signed by the sending institution
- A letter of intent
- A CV
- A portfolio (digital or paper)
- 1 photo

The application package must be sent:

By post to ESAD Orléans International Office Julie QUESNEL 14 rue Dupanloup 45000-Orleans
FRANCE

Or by mail to international@esad-orleans.fr

Deadlines

Deadline to apply for the **1st semester: 15th of May**

Deadline to apply for the **second semester: 1st of November**

ÉSAD Orléans will send its decision within a month

Academic program and courses

Degree programs:

DNA: BA levels

DNSEP design: MA levels

2 options:

- Visual/graphic design
- Spatial / Product design

Course catalogue : <https://www.esad-orleans.fr/wp-content/uploads/2018/11/course-catalogueSTC.pdf>

The **first two years** consist of **foundation courses** in drawing, graphic design, 3D, color techniques, photo, multimedia, general studies etc. At the end of the 1st year, the students decide about the future direction they want to take in design (Graphic Design, Spatial or Product Design).

Our purpose is to educate and train professional designers, who are equally capable of working both autonomously and in teams, with the ability to respond and adapt to the demands of a rapidly changing society.

A team of 55 teachers encourage students to find their own routes by merging traditional foundation studies and culture whilst being able to acquire and specialize in the new techniques. Teaching is delivered by members of staff who are all practitioners, whether they are Artists, Architects, Designers, Sociologists, Historians, Philosophers, and Scientists.

Teaching is mainly studio-based and in year 4, the academic syllabus is based on the Arcs (Ateliers de Recherche et de Création - "Workshops in Research and Creation". The students work mainly on self-initiated projects and can explore a personal and experimental approach thanks to a wide range of facilities including wood and metal workshops, model-making, photography, video, multimedia, printmaking, computer graphics, desktop publishing, digital design technologies, CAD/CAM and robotics

Design course in English 'Responsible design'

This course has been implemented to help international students to integrate more easily to their new environment. It is cross-disciplinary and open to all levels. Dispensed only in the fall semester (from October to the end of January), it is validated by 8 credits.

French support courses

Free french support courses for incoming students (2hs/ week)

Practical information
